WORKING IN HIS NORTH FORGE studio in Sterling Heights, Dan Ryniak creates decorative metal designs and fabrications that adorn homes and businesses throughout the metro area.

## North Forge Offers Design & Metal Work

Perhaps you've envied the ironwork gates that span a driveway, grace a staircase or guard a yard. We wonder, where do people get those creations?

Many of them probably have found North Forge, Inc., a Sterling Heights firm owned by Dan Ryniak. He is a decorative metal fabricator and North Forge offers a very distinct service in custom metal design and fabrication for a broad range of metal applications.

"We are a small family-owned business with a strong work ethic," says Ryniak. "Most of our projects are one-of-a-kind custom decorative pieces, which include stair-

case railings, guardrails, entry gates, furniture and more.

"We take pride in our skills with iron, stainless steel, and aluminum. We also commonly use elements of brass, copper, wood, glass and tile in our work."

Ryniak, who has been making furniture since middle school, learned blacksmithing at the Center for Creative Studies.

His one-of-a-kind pieces are created in close collaboration with his clients to determine their desired style.

"We then take their style and fit it into the envelope

of the installation space, continually working closely with the client through the whole design process. We can obtain unique designs due to our knowledge of blacksmithing and metalworking as well as the specialized

CAD for his installation blueprints. He also holds a Michigan builder's license.

If you want to see more of North Forge's offerings, check their website at [www.northforge.net](http://www.northforge.net). For information, call 248-842-8074.

FROM PIECES TO TALK ABOUT, like the table above, or a sleek steel handrail for a modern staircase, Dan Ryniak can design and create it for you in his North Forge studio. If you have an idea for a metal piece, you can reach him at 248-842-8074.

assortment of tools in our studio. We always provide our clients with excellent craftsmanship, and the best design for their budget," he promises.

It's a modern age, even if you want a traditional look, and Ryniak uses
